

Computing Progression of Skills

The document below has been designed to show how we will cover all of the relevant Computing knowledge and skills across our school. The context in which Computing is taught is left to the discretion of teachers, where possible trying to match the content of their unit to their year group's topic.

| Year Group | Information Technology | Digital Literacy | Computer Science |
|------------|---|--|--|
| 1 | Use technology purposefully to organise, store and retrieve digital content. Use technology purposefully to create digital content. | Use technology safely. Keeping personal information private. Identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies. Recognise common uses of information technology beyond school. | Understand what algorithms are. Use algorithms to create simple programmes. |
| 2 | Use technology purposefully to organise, store and retrieve digital content. Use technology purposefully to create and manipulate digital content. | Use technology safely and respectfully. Keeping personal information private. Identify where to go for help and support when they have concerns about content or contact on the internet or other online technologies. Recognise common uses of information technology beyond school. | Understand what algorithms are. The child can understand how algorithms are implemented as programs on digital devices, and that programs execute by following precise and unambiguous instructions. Create and debug simple programs. Use logical reasoning to predict the behaviour of simple programs. |
| 3 | Select, use and combine a variety of | Use technology safely, respectfully and responsibly. | Design, write and debug programs that accomplish |
